

Julia Robinson Mathematics Festival.®

A Joyful Collaboration!

Julia Robinson Mathematics Festival ([JRMF](#)) teamed up with Global Math Week on Saturday, October 6, to offer K-12 students a [booklet with Exploding Dots activities](#), along with other games and puzzles, to celebrate mathematics.

[JRMF](#) supports locally organized events that inspire K-12 students to think critically, to explore the richness & beauty of mathematics through collaborative, creative problem-solving.

We invite you to suggest [activities](#) and to host your own [Festival](#).

For much more information, please visit [jrmf.org](#).

Best wishes during [Global Math Week](#),

Nancy Blachman, info@jrmf.org

Founder, [Julia Robinson Mathematics Festival](#)

Exploding Dots

Julia Robinson
(1919 - 1985)

Exploding Dots is an astounding mathematical story that starts at the very beginning of mathematics – it assumes nothing – and swiftly takes you on a wondrous journey through grade school arithmetic, polynomial algebra, and infinite sums to unsolved problems baffling mathematicians to this day. Visit [globalmathproject.org](#) to join an exploding community and to learn more about the Global Math Project.

Visit [www.JRMF.org](#) for more information about Julia Robinson Mathematics Festivals.

Activities by James Tanton, Founder, Global Math Project. Edited by Mark Saul, Executive Director, Julia Robinson Mathematics Festival, and Alice Peters.
